

**basalte**

Simplicity is the ultimate sophistication.

Leonardo Da Vinci

Home automation should be simple and add comfort to the complexity of the modern home.

Home automation systems are often designed from a technical point of view, while we believe that one should be able to control everything in an intuitive way, without thinking about which switch to press.

# TACTO

In our search for simplicity, we have created a new user experience using innovative touch sensitive technology, which makes the entire surface sensitive to touch.

As a single function switch, Tacto switches or dims lights, or controls scenes and blinds at only the slightest touch without pointing to a specific area.

The integrated multicolor LED backlight makes Tacto visible in the dark and can also be used for status feedback.

# MONA

Mona is a sensually designed light switch with a finely drawn geometric stylistic language. Harmoniously it seems to melt into the wall. By its simple, architectural shape it goes with any style.

Mona features a touch-sensitive surface allowing comfortable and elegant handling.

In switched-off position light emitting diodes illuminate the light switch with a softly shimmering ring.

# SENTIDO

Sentido, the light switch reinvented.

The basic idea of Sentido is very simple, yet very innovative.

Divide a square in equal surfaces that each control different functions.

The entire surface is touch sensitive, creating a very easy and unique way of control.

Touching more than one surface at the same time turns on and off all the lights in a room or can control a general scene. This patented multitouch function makes light control highly intuitive and user friendly.

The integrated temperature sensor reports discretely the room temperature to the home automation system while the multicolor LED backlight can be used for status feedback or simply to light up Sentido in the dark.

# ENZO

Inspired by Italian design of the late fifties, Enzo combines retro with luxury based on craftsmanship and high quality materials.

The fine rounded border is made of polished aluminium while the inlay can be leather or glass.

Despite its retro look, Enzo uses the latest technology and features highly sensitive touch sensors, multitouch capability and temperature sensing.

The integrated multicolor LED backlight makes Enzo visible in the dark and can also be used for status feedback.

# DESEO

Deseo combines great functionality and an innovative user interface in a sleek minimalistic design. Highly sensitive touch sensors are used to navigate through the different functions.

Deseo can control lights, scenes, shutters and blinds, temperature and even the multiroom music system. All at the slightest touch.

Because we like to keep things simple.

# AURO

Auro is everything what a motion detector should be, small, fast and almost invisible. When mounted in the ceiling, the innovative flat design makes Auro to completely blend in. Only requiring an opening of 44mm, it is very easy to install.

Auro has a built in light sensor for light dependent switching, dimming and controlling scenes and can even behave differently during day or night.

With a vertical detection angle of 90° it has a detection area with a diameter of 5m when installed at a height of 2.5m, making it perfect for hallways, toilets and small rooms.

actual size

# FRAME

To complement our products with sockets and outlets, we have designed frames with the same finishing as our switches.

These frames can be used in combination with 55mm inserts from all major manufacturers. The frames are available in 1-gang, 2-gang and 3-gang.
